PROFESSIONAL SUMMARY

Software Developer fresher skilled in **JavaScript (ES6+), HTML5, CSS3, Python, SQL** and automation workflows. Hands-on exposure to **Git**, **Jenkins**, **Docker**, and **CI/CD** through DevOps internship, with interest in AI technologies like **LLMs** and prompt engineering.

EXPERIENCE

Full Stack Development Program (Trainee), *KodNest*
March 2025 – Feb 2026

- Built responsive web applications using HTML5, CSS3, and JavaScript.
- Developed backend logic using Python and SQL.
- Improved data processing efficiency by 30% through optimized backend workflows.

DevOps Engineering Intern, *IBM & Roaman Technologies*
September 2024 – January 2025

- Worked with Git, Jenkins, Docker, and CI/CD pipelines.
- Managed 10+ deployments using Git and CI/CD workflows.
- Improved workflow efficiency through automation and deployment practices.

EDUCATION

Bachelor of Engineering (CSE)
Maratha Mandal Engineering College
CGPA: 8.45 | 2021 – 2025

Pre-University Course (PUC)
Jyoti PU College
Percentage: 81% | 2019 – 2021

SSLC
Mahila Vidyalaya High School
Percentage: 82% | 2016 – 2019

SKILLS

Programming Languages
Python, JavaScript (ES6+), HTML5, CSS3, SQL

Productivity & Office Tools
MS Excel, MS Word, PowerPoint, Google Sheets

Automation & AI
n8n, Automation Workflows, LLMs, Prompt Engineering

Frontend
Responsive Web Design, UI/UX Principles

DevOps Tools
Git, GitHub, Jenkins, Docker, CI/CD

Design Tools:
Figma

PROJECTS

1. Lead Sniper
Tech Stack: n8n, Automation, GitHub API
- Automated lead identification using GitHub API and filtered 100+ users.
- Increased workflow efficiency by 60% using rule-based automation.
- Integrated GitHub API with automation workflows for real-time lead detection.

2. Weather Delay Project
Tech Stack: Python, Automation, Weather Data Handling
- Processed 50+ orders using weather data and automation logic.
- Reduced manual tracking effort by 70% through automation.
- Built backend logic to track order delays using weather data.

3. Project Paradox - Crop Recommendation System
Tech Stack: React, Django, MySQL
- Built a crop recommendation system using user input data.
- Connected frontend and backend modules for smooth data flow.
- Gained project-level exposure to React, Django, and MySQL.

4. Face Attendance System
Tech Stack: Python, OpenCV
- Built a real-time face recognition attendance system with around 90% accuracy.
- Reduced manual attendance effort through automated face detection.

CERTIFICATIONS

DevOps Internship
IBM & Roaman Technologies

Python with Machine Learning
Compsoft Technologies

UI/UX Design
Varcons Technologies
